PROFILE

I am a software developer who is passionate about creating functional applications and developing using different mediums. I have a background in economics and experience in the consulting sector. I worked as a research analyst for two years, during which I got exposure to the power of programming and decided to pursue a career change into the tech industry. I got drawn into the tech sector due to its changing nature that requires constant creation and innovation.

Full Stack Web Development

TECHNICAL TRAINING

SOFTWARE DEVELOPMENT COURSE

CodeClan | Edinburgh | Feb 2021 – Jun 2021

The Professional Software Development Course is a 16-week SQA accredited intensive program, involving 800+ hours of coding.

During the course I completed a variety of projects (individual and group) and learnt the fundamentals of software development including essential tools and best practices.

PROJECTS

Flex & Flow Yoga | Individual | 3 Days

Python web application to help admin staff of a yoga studio manage members, classes, and bookings. Logic written in **Python**, back-end using **PostgreSQL**, front-end views and controllers in **HTML** and embedded **Jinja** parsed into **Flask** web framework. Designed with **CSS**. [View App](#)

Who Wants to Be a Millionaire | Group | 3 Days

Vue.js JavaScript web application using an **external API (JSON)** to create a browser game which emulates the game show. Vue components integrating **JavaScript** logic, **HTML5** with embedded **Vue.js** and **CSS**. **MongoDB** used to store player names and their scores. [View App](#)

The Ward | Group | 3 Days

Spring Boot/Java and React/JavaScript browser game that pays homage to the NHS heroes, with the player having to cure as many patients as possible. **Spring Boot/Java** used for the API/Backend and **React/JavaScript** used for the front-end. Designed with **CSS**. [View Front-end](#)
